(54) GOLF CLUB HEAD

(57)Abstract:

PROBLEM TO BE SOLVED: To sufficiently show up the cavity effect improving the face rigidity.

SOLUTION: A dent 4 is formed on the back face side of a head main body 3 remaining a thick periphery part, a band shaped reinforcing bridge 5 is formed from the top side 3a of the thick periphery part to the sole side 3c to form a gap between the reinforcing bridge and the dent, and the top part of the reinforcing bridge is wider than the sole part of the reinforced bridge. A weight may be equipped on the reinforcing bridge.

LEGAL STATUS

[Date of request for examination] 26.03.1996

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number] 2670435

decision of rejection]
